EDUCATION

Indian Institute of Technology Kharagpur, Kharagpur Doctor of Philosophy, Centre of Excellence in Artificial Intelligence	[August 2021 - Present] Overall GPA: 8.5/10
Indian Statistical Institute, Kolkata Master of Technology, Cryptology and Security Research Unit	[July 2019 - July 2021] Overall Percentage: 73.55%
University of Calcutta, Kolkata Master of Science, Department of Pure Mathematics	[August 2017 - June 2019] Overall Percentage: 67.6%
The University of Burdwan, Bardhaman Bachelor of Science, Department of Mathematics	[June 2014 - July 2017] Overall Percentage: 70.75%
West Bengal Council of Higher Secondary Education Class XII	[2012 - 2014] Overall Percentage: 81.4%
West Bengal Board of Secondary Education Class X	[2010 - 2012] Overall Percentage: 75.71%

RESEARCH INTEREST

Computer Vision, Deep Learning, Digital Image Processing, Image Retrieval, Medical Image Analysis, Linear Algebra

SKILLS AND EXPERTISE

- **Programming Languages:** Python, MATLAB, C, SQL
- **Library/Framework:** Pytorch, OpenCV, Pandas, Matplotlib, Plotly, Scikit-Learn, Torchmetrics, ASTRA

PROJECTS

Medical Image Retrieval Using Deep Neural Hashing PhD Thesis Dr. Debdoot Sheet	[August 2021 - Present]
<ul style="list-style-type: none">• Develop a method to retrieve images with respect to organs and associated pathology towards achieving EBM. [Github Link]• Develop a structured Deep Neural Hashing method to retrieve images with respect to various attributes.• Design a framework for multimorbidity image retrieval to access the similarity between different symptoms occurring in chest X-rays.	
Computed Tomography Sinogram Denoising Project Sponsored by GE Healthcare	[August 2023 - Present]
<ul style="list-style-type: none">• Dual-domain denoising for low-dose CT using sinogram total variation and multi-scale Curvelet filtering.• A dataset has been constructed based on sparse views and varying levels of noise in low-dose sinograms.• Noise distributions according to X-ray dose variations are modeled and noisy sinograms are generated.• Employed U-Net architecture-based diffusion model with different time levels for the reconstruction of low-dose CT images.	
Investigating Applications of the Target Difference Algorithm in Keccak & Ascon M.Tech Thesis Dr. Dhiman Saha	[January 2021 - June 2021]
<ul style="list-style-type: none">• Implemented the difference phase and value phase of target difference algorithm on S-box of Keccak and Ascon hash function.	

EXPERIENCES

Teaching Assistant NPTEL
<ul style="list-style-type: none">• <i>Deep Learning for Visual Computing:</i> Oversee more than 1000 students, design assignments, create questions, and evaluate students' understanding of deep learning concepts.

AWARDS and ACHIEVEMENTS

- Qualified in CSIR-UGC NET Lectureship on 2019 (June) with AIR-94.
- NBHM-2018 (Scholarship) – Written Qualified.
- NBHM-2019 (Fellowship) – Written Qualified.
